Professional Summary

Flutter Mobile Developer with hands-on experience designing, building, and integrating full-stack mobile applications across fitness, social media, e-commerce, and tracking platforms. Skilled in Flutter (Dart), REST API integration, Appwrite and Firebase backend services, SQL/MongoDB databases, and state management (Riverpod/Provider). Adept at translating real-world requirements into clean, scalable, high-performance mobile solutions with a focus on user experience, maintainable architecture, and practical problem-solving.

Technical Skills

Mobile Development: Flutter, Dart, React Native
State Management: Riverpod, Provider
Backend Integration: Firebase, Appwrite, REST APIs
Databases: SQL, MySQL, MongoDB
Supporting Skills: HTML, CSS, JavaScript, Angular, Node.js, Express, PHP, Python
Version Control & Tools: Git, GitHub, Postman, VS Code

Projects

Full-Stack Social Media Application – Flutter
Developed a cross-platform social media app with user authentication, posting, and messaging. Integrated Firebase backend for real-time database and cloud storage. Implemented scalable architecture with Provider state management.

E-commerce Platform for Used Books – Flutter (Graduation Project)
Built a mobile app for buying/selling used books with secure payment integration. Designed Appwrite backend for inventory and user management. Implemented responsive UI and seamless navigation.

Calorie Tracking App – Flutter
Tracked daily calorie intake and calculated nutritional values. Integrated local database for offline support and persistent data storage.

Water Intake App – Flutter
Tracked hydration, sent reminders, and visualized daily progress. Focused on smooth animations and intuitive UI/UX.

Full-Stack Fitness Application – Flutter + Backend Integration
Tracked workouts, user progress, and personalized routines. Implemented Firebase authentication, cloud storage, and push notifications.

Education

Bachelor of Information Systems (English Section), Arab Academy for Science and Technology, Cairo, Egypt.
Graduated: July 2023 | GPA: 3.2 / 4.0 (Very Good)

Certifications

IBM Data Science Professional Diploma – Python, SQL, ML, Data Visualization
Board Infinity / Coursera: Frontend Development using Angular, RESTful APIs with Node.js & Express, Complete MEAN Stack Application Development

Soft Skills & Languages

Teamwork • Communication • Problem-Solving • Adaptability | Arabic: Native • English: Fluent
